

# 3 ways to enter Unicode UTF-8 text for Cameroon Languages

KeyManager provides the easy way.

When using Code points or Hex editor, Diacritic codes simply come behind the vowel encodings.

Use editor that supports Hexadecimal values, like Notepad++ with Hex plugin.

Keyman Desktop  
Quick Unicode Input  
Hexadecimal Editor

IPA example: **Zĩ pèmé á-sá mólǒ’.**

Version 2009-12-31
